***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 4-6-06 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14, "the TiN" lacks antecedent basis.

Claim 25 fails to further limit the claim from which it depends because of the "further comprising" terminology which is broader than the "consisting of" terminology in claim 14. Furthermore, the components of claim 25 are already included in claim 14. A dependent claim must further limit the claim from which it depends.

***Claim Rejections - 35 USC § 102***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 1755

5. Claims 14,16-18,25-28 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tajima et al (5,885,916), for reasons of record.

Applicants' argument that Tajima et al teach a  $\text{SiO}_2/\text{Re}_2\text{O}_3$  ratio of 1.5 to 10 is not persuasive in overcoming the rejection because the instant claims do not set forth a  $\text{SiO}_2/\text{Re}_2\text{O}_3$  ratio. When the range of Tajima et al is converted to the ratio applicants use,  $\text{SiO}_2/\text{Re}_2\text{O}_3 + \text{Al}_2\text{O}_3 + \text{SiO}_2$ , the range taught by Tajima is .6 to .777 ( $1.5/1+1.5=.6$ ;  $3.5/3.5+1=.777$ ).

6. The rejection of the claims over Oda et al (5,804,523) is withdrawn because Oda et al fail to teach  $\text{Al}_2\text{O}_3$ .

7. The rejection over Hintermayer (5,998,319) is withdrawn in view of the "consisting of" terminology in the claims excluding the other components of Hintermayer et al.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl E. Group whose telephone number is 571-272-1368. The examiner can normally be reached on M-F (6:30-4:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571-272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
